SECTION C - DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

C.3. CHANGE TO THE SCOPE OF WORK (SOW) - REVISION 1
HEMTT, PLS AND HET ARMOR DOOR HINGE UPGRADES

C.3.1. Objective. The existing doors on the HEMTT, PLS and HET armor kits are significantly heavier than the OEM vehicle doors. This has been found to cause sagging at the hinge on these armor doors after use. A kit is to be developed and produced to reinforce the existing door hinges of fielded vehicles with armor kits installed as well as to provide a ramp and support at the bottom of the door.

C.3.2. General Requirements. The basic kit will include all components and fastening hardware needed for both driver's and passenger's doors on a single vehicle. The kit will allow for door operation without degradation while providing hinge reinforcement, a ramp guide for the bottom of the door, and support of the door weight when closed.

C.3.3. Installation Instructions. Installation instructions shall be included with each kit which pictorially shows the location of all components of the kit as installed. The instructions shall provide a complete step by step installation process for complete installation of the kit on a single vehicle. A parts list will be included in each set of instructions that lists all parts included within the kit (part number, nomenclature, and quantity shall be included at a minimum).

c.3.4. Quantities. Total quantity of kits to be provided shall be 280 complete kits.
