Name of Offeror or Contractor:

SECTION A - SUPPLEMENTAL INFORMATION

The purpose of this amendment is to:

1. Extend the closing date of solicitation W56HZV-12-R-0223, from 07MAR2013 to 22MAR2013, in order to accommodate the requirement changes made in this amendment(0004).

The new closing date is 22MAR2013. All offers must be submitted on or before this date.

2. Modify the Description for Purchase as follows:

Section 3.6.2. Weight. Each tool box and moveable piece within the tool box shall be capable of being lifted and moved by manpower. The fully loaded tool box shall not exceed an overall weight of 65 pounds.

Section 3.6.3. Handles. The handle(s) shall each be rated for not less than 1-1/2 times the weight of the fully loaded tool box. The handles shall be installed using mechanical fasteners that cannot be readily removed, i.e. rivets or screws that cannot be removed with a screwdriver. (Reason: In the absence of another tethering point, the handle will be used to tie the tool box to a fixed post, pillar or another tool box with a cable and padlock for security. If the handle can be easily removed, then the tool box can be carried away without having to defeat the cable or padlock. Furthermore, if the handles are used to secure the tool box in a moving vehicle they need to be able to withstand higher forces than those encountered in a simple lift and carry situation.)

A total of no less than one handle and no more than three handles shall be included; if only one handle is included it shall be mounted directly centered on top. If two handles are provided, one shall be positioned on each side of the tool box (excluding the front and back). If three handles are provided, one shall be directly centered on top and one each shall be positioned on the sides of the tool box (excluding the front and back).

Handles shall not affect the strength and firmness of the box. While in use, the handles located on the sides of the tool box shall stop at a 90-degree angle to the face of the box. If a bar type handle is used, the clearance for the hand inside the handle shall be not be less than 2 inches by 4.25 inch.

3. There are no other changes as a result of this amendment; all other terms and conditions remain in full force and affect.
