

## QUESTIONS & ANSWERS for W56HZV-12-R-0439

The following questions have been received regarding the above Solicitation. Answers are current as of 14 December 2012.

QUESTION 1: The requirements appearing on reference drawing C5-19-3212, which is called out on reference drawing PL5-19-6369, were questioned.

Answer 1: Documents C5-19-3212 and PL5-19-6369 are no longer applicable and were supplied for "For Reference Only". The Government makes no guarantees on the usability of any "For Reference Only" documents.

QUESTION 2: Does the minimum thickness of 6.35 mm [.25in] refer to the total thickness of the liner and cover or something else?

Answer 2: The 6.35 mm [.25in] dimension on both particulate and gas filters (see pages 6 and 7 of MIL-PRF-51527C) refers to the minimum width of flat annular contact surface on the end caps. These contact surfaces form two concentric rings surrounding the area where the gasket is applied.

QUESTION 3: Drawing PL5-19-6263 and its subset of drawings were requested.

Answer 3: Drawings PL5-19-6263, 5-19-5582 and 5-19-6264 have been posted to FBO as "For Reference Only" drawings.

QUESTION 4: What is the required pressure differential between the HD (or GB) challenge and the downstream side of the gasket?

Answer 4: There is no required pressure differential.

QUESTION 5: Does the government have a required or recommend a laboratory to perform the required HD/GB testing on the gasket and the HEPA media?

Answer 5: Contact information as follows:
