

Joint Assault Bridge Procedure for Acquiring the M1A1 Model Files W56HZV11R0322

M1A1 3D Model files are now available to potential Offerors in ISO 10303 STEP format. Please note that the models are Controlled Unclassified Information (CUI) and must be handled accordingly. Each of the STEP files are marked with the appropriate distribution statement and export control warnings; these markings are not to be modified or removed.

To acquire the model files:

1. If not already complete, submit the Non-Disclosure Agreement (NDA) form found at: <http://contracting.tacom.army.mil/majorsys/jab/jab.htm>. Ensure the CAGE code is included in the subject line of an email request and on the NDA form. The form must also be physically signed and returned via email to Winslow.t.morrow.civ@mail.mil
2. Submit an e-mail request to Winslow.t.morrow.civ@mail.mil detailing:
 - a. E-mail address to which the model files should be sent
 - b. Need to know which explains how the requester intends to use the information
3. Upon verification that the CAGE has an active Joint Certification Program (JCP) status and upon receipt of a completed NDA, access to the model files will be granted to the data custodian named in JCP via the AMRDEC SAFE Web Application (<https://safe.amrdec.army.mil>). The file may be downloaded from the site only one time using the unique password provided.
4. The 34 assembly files will be provided as a single .zip file and must first be extracted.
5. To assemble the model, each assembly coordinate system must be constrained to the global coordinate system.

The Government reserves the right to deny the request if the requester does not meet CUI requirements or does not present a valid need to know. If you have any questions about this process or have difficulties acquiring and assembling the model, please send an email to Winslow.t.morrow.civ@mail.mil.
