

3D CAD Models

The Development Design Technical Data (3D CAD model) shall be in accordance with the following:

- a) 3-dimensional CAD model represents the proposed offeror's design for the JLTV-GP vehicle configuration.
- b) The CAD model shall be representative of information presented with the rest of the proposal; any differences between the CAD model and the proposal shall be clearly noted.
- c) CAD model format shall be capable of being opened and viewed with PTC Pro/Engineer Wildfire 4.0.
- d) The CAD model shall be in the global body position.
- e) The top level assembly file name shall be clearly identified.
- f) Prior to submission, the submitter shall verify that the top level assembly opens without errors.
- g) The CAD model shall be capable of being opened and viewed without any special instructions.
