

JLTV EMD Phase: International Program Update

The JLTV EMD program is intended to be an International Program with Australia, and as such, the JLTV Program Office is anticipating Australian government personnel to participate in program events, meetings, and Government Integrated Product Teams (IPTs) with successful EMD offerors throughout the EMD contract period of performance. As briefed at our Industry Day, PM JLTV stresses the importance of industry coordinating with their company's export compliance personnel in the preparation of applicable export authorization requests, and ensuring that those requests are scoped and timed appropriately in order to support the JLTV program. Successful offeror(s) to an EMD RFP should have Technical Assistance Agreements (TAAs) in place prior to Start of Work Meetings (SOWMs) in order to export any program information.

It is the responsibility of any party making an export of controlled hardware, technical data and defense services to a "foreign person" (defined to include both a foreign individual and a foreign firm) to comply with the appropriate statutes and regulations including, but not limited to, the International Traffic in Arms Regulations (ITAR) and the Export Administration Regulations (EAR)." Contractors are advised that any unauthorized export of JLTV information will subject them to significant penalties associated with violations of all export control regulations and laws including the Arms Export Control Act (22 USC 2751, et seq), and Export Administration Act of 1979, as amended (50 USC 2401, et seq) as maintained by Executive Order No. 13222, August 17, 2001.

The Directorate of Defense Trade Controls (DDTC), Bureau of Political-Military Affairs, in accordance with 22 U.S.C. 2778-2780 of the Arms Export Control Act (AECA) and the International Traffic in Arms Regulations (ITAR) (22 CFR Parts 120-130), is charged with controlling the export and temporary import of defense articles and defense services covered by the United States Munitions List (USML). To learn more about working with DDTC, please visit their Web site (www.pmddtc.state.gov). The Licensing process may take 3-6 months for approval.

The Government has currently reserved the following RFP number in anticipation of releasing a DRAFT RFP: W56HZV-R-11-0329. No DRAFT RFP or RFP document exists at this time. Please continue to monitor our Procurement website for updates.
