SECTION C - DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
C-1	52.204-4600 CONTRACTOR VERIFICATION SYSTEM (CVS) PROGRAM	APR/2007

The contractor is responsible for processing applications for Common Access Cards (CAC) for every contractor employee who deploys with the military force, OR who has need to access any government computer network in accordance with FAR 52.204-9, Personal Identity Verification of Contractor Personnel.

The contractor is responsible for managing requests for new or renewal CAC cards in sufficient time to ensure that all contractor employees have them when needed to perform work under this contract. The norm is at least ten calendar days advance notice to the Trusted Agent* (TA), unless there are extenuating circumstances approved by the Contracting Officers Representative (COR) or Contracting Officer. *The COR will be the TA for this contract.

The contractor shall obtain an Army Knowledge Online (AKO) email address for each applicant, including subcontractors, who may be deployed or require logical access to a government computer network. This can be done by going to <http://www.us.army.mil> and register as an Army Guest with the sponsor being the COR. Note: If a contractor employee loses the privilege to access AKO, they lose the ability to renew their CAC. Therefore it is critical that contractor employees maintain their AKO accounts.

It is recommended that a Corporate Facility Security Officer (FSO) be established to serve as your firms single point of contact for CVS. If a FSO is not established, each contractor employee requiring a CAC card will be required to process their own applications.

CAC applications must be processed through the DoDs Contractor Verification System (CVS). The contractors FSO or contractor employee shall submit requests for a CAC via email to the CVS Trusted Agent (TA) at iacapki.helpdesk@us.army.mil or 866-738-3222 before accessing the CVS website.

The government will establish a CVS application account for each CAC request and will provide each contractor employee a USER ID and Password via email to the FSO. The FSO or contractor employee shall access the CVS account and complete the CAC application (entering/editing contractor information as applicable) at <https://www.dmdc.osd.mil/appj/cvs/index.jsp>.

The FSO or contractor employee will submit completed applications in CVS, and will follow up to ensure that the TA is processing the request.

The government will inform the contractors applicant via email of one of the following:

- Approved*. Upon approval, the information is transferred to the Defense Enrollment Eligibility Reporting System (DEERS) database and an email notification is sent to the contractor with instructions on obtaining their CAC. The contractor proceeds to a Real-Time Automated Personnel Identification System (RAPIDS) station (<http://www.dmdc.osd.mil/rs1/owa/home> provides RAPIDS locations).
- Rejected*. Government in separate correspondence will provide reason(s) for rejection.
- Returned. Additional information or correction to the application required by the contractor employee.

*The contractor will maintain records of all approved and rejected applications.

At the RAPIDS station, the RAPIDS Verification Officer will verify the contractor by SSN, and two forms of identification, one of which must be a picture ID. The Verification Officer will capture primary and alternate fingerprints and picture, and updates to DEERS and will then issue a CAC.

Issued CACs shall be for a period of performance not longer than three (3) years or the individuals contract end date (inclusive of any options) whichever is earlier.

The contractor shall return issued CACs to the DEERS office upon return from deployment, departure or dismissal of each contractor employee. A receipt for each card must be obtained and provided to the TA/COR.

A CAC cannot be issued without evidence that a National Agency Check with Written Inquires (NACI) has at least been initiated by the FSO. CVS will be linked to the Joint Personnel Adjudication System (JPAS) in the near future. The TA will have to verify via JPAS that the NACI has been initiated by the FSO before he/she can approve a contractor request for a CAC.

Details and training on CVS are available on AKO at <https://www.us.army.mil/suite/portal/index.jsp> or by contacting the CAC helpdesk at iacapki.helpdesk@us.army.mil or 866-738-3222.

The small business size standard corresponding to this NAICS code can be found at

L-24	52.246-4001 (TACOM)	OFFEROR'S QUALITY ASSURANCE SYSTEM	MAY/2005
------	------------------------	------------------------------------	----------

(a) This solicitation will result in a contract that will require the contractor to use a quality-assurance system to ensure the quality of the contract items.

(b) To allow TACOM to analyze your proposed quality system, especially if that system is not based on a national or international standard, you must identify your system as part of your response to this solicitation. If you do not intend to use ISO 9001:2008 as required elsewhere in this contract, Clause 52.246-4025 (Higher-Level Contract Quality Requirement-TACOM Quality System Requirement) of this solicitation asks you to identify what quality assurance system you will use if awarded a contract.

Name of Offeror or Contractor:

(1) If the Government is requiring ISO 9001:2008 (tailored: delete paragraph 7.3) where you will be required to supply conforming product to an established design, and your quality system conforms to ISO 9002, MIL-I-45208 or another comparable specification or standard, this is sufficient description: you need not further describe your quality system in response to this solicitation. Identify in Clause 52.246-4025 (Higher-Level Contract Quality Requirement-TACOM Quality System Requirement) of your offer, which standard you intend to use.

(2) If the Government is requiring ISO 9001:2008 (untailored) where your capability to design and supply conforming product needs to be demonstrated, and your quality system conforms to ISO 9001, MIL-Q-9858, or another comparable specification or standard, this is sufficient description: you do not need to further describe your quality system in your response to this solicitation.

Note: If the Government is requiring ISO 9001:2008(untailored), quality systems conforming to ISO 9002 or MIL-I-45208 or comparable quality systems are not acceptable for this contract.

(3) If your quality system does not conform to any of the standards listed immediately above, then in addition to identifying in Clause 52.246-4025 (Higher-Level Contract Quality Requirement-TACOM Quality System Requirement), the name of the quality system you intend to use, you also must provide a description of your proposed system, in enough detail to let us assess its suitability for use in performing the resulting contract. This is of particular importance if your proposed system is unique, using quality control methods and techniques that your company has developed in-house.

(4) If you provide a description of your quality system, make sure that your description covers how your system:

- (i) Achieves defect prevention, and
- (ii) Provides process control, and
- (iii) Ensures adequate quality controls throughout all areas of contract performance.

If some of the features of your system are described in other forms (brochures, for example, or articles), you may attach a copy of such items to your response to this solicitation. If your system is described in a textbook or publication that is available from a commercial or academic distributor, include a reference to the publication by author, title, copyright date, and publisher in your system description. You need not physically attach a copy of a textbook to your offer.

(c) If you already described your quality system as an attachment to another TACOM solicitation within the previous 90 days, you can either send us another copy, or simply identify the number of the previous solicitation.

(d) If you do not provide us a description of your quality system, or if the description you send does not show all of the required features as stated in paragraph (b) above, your offer may be ineligible for contract award.

This does not preclude additional mandated markings as may be required by the contract.

Protection of CUI Information

Access: CUI may be released only to an individual who has a valid need for such access in connection with the accomplishment of a lawful and authorized Government purpose. Information in any media format may only be disseminated on a need-to-know basis. The need-to-know restricts the use or dissemination of CUI data to those individuals or organizations with direct affiliation with the given program or project. Further dissemination of such information will be at the discretion of the Government Security Manager. Personnel no longer requiring access to CUI must delete or surrender any in their possession and terminate future access to it.

Storing/Handling: During working hours, take reasonable steps to minimize risk of access to CUI by unauthorized personnel. After working hours, store CUI information in locked desks, file cabinets, bookcases, locked rooms, or similar means. Do not display CUI in public places (e.g., airports, airplanes, restaurants). Computers used to process CUI do not need to be accredited for classified use. Do not process CUI on public computers (e.g., those available for use by the general public in kiosks, hotel business centers) or computers that do not have access control. Personally owned computers are not authorized to process CUI. Mobile devices used to store CUI electronically (e.g., company-issued laptops, personal electronic devices [PED], removable media) must be physically protected and use NIST/NIAP-approved cryptographic products. These are available at <http://iase.disa.mil/pki/eca> or <http://csrc.nist.gov/cryptval/>.

Dissemination: CUI printed documents and material may be transmitted through mail channels or hand-carried without formal courier orders. FOUO information may be disseminated to DoD personnel and DoD contractors to conduct official business for the program. If dissemination is required outside of DoD personnel or DoD contractors, contact the Government Security Manager for approval. Technical data will follow the release instructions identified in the Distribution Statement. Use secure communications whenever possible; however, land-line telephones are more secure than cellular telephones and should be used whenever available for discussions involving CUI. Transmit voice and facsimile transmissions only when you have a reasonable assurance that only authorized recipients will have access to the transmission. Digital transmission shall comply with the below:

\b7 All transmission and/or dissemination of CUI identified with a Distribution Statement or marked FOUO (i.e., email and file transfers) must use NIST/NIAP-approved cryptographic vendors and algorithms, e.g., DoD-approved Public Key Infrastructure Certification. These are available at <http://iase.disa.mil/pki/eca> or <http://csrc.nist.gov/cryptval/>. This encryption requirement includes passcodes to teleconferences or web conferences where there is a reasonable expectation that CUI may be discussed. When encryption is not available, a government collaborative suite (aka Integrated Digital Environment [IDE]) must be used to transmit CUI. Encrypt all wireless external data connections.

\b7 Contractor-hosted collaborative suites may be used for digital transmission and/or dissemination of CUI by personnel not located on a government backbone (e.g., NIPRNET), provided the following conditions apply:

Use only NIST/NIAP-approved cryptographic vendors and algorithms. The latest validation lists may be obtained at <http://iase.disa.mil/pki/eca> or <http://csrc.nist.gov/cryptval/>.

Use an internally hosted service that does not use a third-party collaborative suite service provider.

\b7 All computers containing CUI must be either protected by physical isolation from all personnel without a valid need for the information or protected using NIST/NIAP-approved cryptographic products. Discretionary access control measures must be used to preclude access to CUI by users who are not authorized access to CUI. After working hours, when not in physical possession of the owner, all electronic assets containing CUI must be afforded a reasonable degree of physical protection to prevent theft of program information (e.g., locking up laptops or cable locking them to a stationary base, storing in trunk, or storing out of sight).

\b7 Do not post CUI to web pages that are publicly available or have access limited only by domain/IP restrictions. As permitted by other contract provisions, CUI may be posted to web pages that control access through the use of a DoD approved Public Key Infrastructure Certification and that provide protection via use of secure sockets, or other equivalent technologies. These are available at <http://iase.disa.mil/pki/eca>.

\b7 As new technologies become available in the electronics arena, care should be given to providing a reasonable degree of

protection from known vulnerabilities.

\`b7 The Internet is Public Access. CUI must be reviewed and officially approved by the PEO GCS Public Affairs Officer for public release before placing on the Internet. This is not applicable when the Internet is used for e-mail transmissions and encryption is used as noted above.

Disposal: Destroy CUI documents by any means approved for the destruction of classified information, i.e. cross-cut shredding or other means that would make it difficult to recognize or reconstruct the information. Clear, purge, or destroy CUI on removable media IAW BPP 03-PE-O-0003 Army Information Assurance Sanitization of Media to AR 25-2. This is available at <https://informationassurance.us.army.mil>.

Report of Loss of CUI: Report any loss of CUI or loss of CUI from a contractor information system that is known to the contractor within the period of performance of this contract to the Government Security Manager. Initial reports shall be made as expeditiously as possible in all cases within 72 hours of discovery. If additional information is required after submission and review of the initial report, guidance will be provided at that time. Mark any reports For Official Use Only, exemptions 2 and 5 apply. Initial report content shall include the following information as available.

\`b7 Applicable dates, including dates of compromise and dates of discovery

\`b7 Threat methodology, including all known resources used (e.g. IP addresses, domain names, software tools)

\`b7 Account of what actions the threat(s) may have taken on victim system/network

\`b7 What information may have been compromised, exfiltrated, or lost, and its potential impact on government programs

Report of Cyber Intrusions: Report cyber intrusions or other compromises of CUI to your supporting counterintelligence office, which will inform the DoD-DIB Common Information Sharing Environment (DCISE). Notify the Government Security Manager of any incidents as well. Refer to Report of Loss of CUI for what needs to be reported, when, and how.

QUALITY ASSURANCE SURVEILLANCE PLAN (QASP)
HBCT TOTAL PACKAGING FIELDING
CONTRACT NO. W56HZV-13-R-0273

I. OBJECTIVE

This plan provides a quality surveillance strategy for HBCT Total Package Fielding (TPF) work efforts performed by the Contractor. The intent of the plan is to provide a basis for the Contracting Officer Representative (COR) in concert with designated Function Technical Representatives (FTR) to evaluate Contractor performance quality. Oversight of Contractor performance will assure contract quality and consistency of services provided to TACOM and the HBCT Platform Program Managers (PM). The plan will also afford the COR a proactive mechanism to identify and preclude major deficiencies in Contractor performance and provide input for annual past performance evaluations in the Governments Contractor Performance Assessment Reporting System (CPARS).

II. DELIVERABLE QUALITY STANDARDS

For the documents themselves, the Government expects them to be timely, thorough, and accurate. That is, they arrive at the designated Government facility on or before the scheduled due date; they completely address the Governments requirements; and the documents have no errors. As each deliverable is usually the result of a series of activities, prior to starting on the task, where appropriate, the Contractor and the Government will agree on the approach for the deliverable, the activities involved to develop it, and the outline or data organization and any other expectations for the final product.

III. DELIVERABLE REVIEWS AND ACCEPTANCE

Documents requiring Government approval are annotated in the DD Form 1423-1 CDRL. All other deliverables will require a Government review for completeness. After the delivery of these documents, the Government will have five (5) business days to review the document and provide the Contractor with a list of any required revisions and/or corrections. The Contractor then will have three (3) business days to make these corrections and redeliver the document to the Government. However, the Contractor is encouraged to review drafts of documents with the Government COR/FTR leads and other stakeholders, reducing the likelihood that the document will be found deficient, and therefore reducing rework for all parties. Once accepted, deliverables become the property of the Government to be used in support of HBCT Total Package Fielding Programs.

IV. DELIVERABLE PERFORMANCE EVALUATION

The performance threshold briefly describes the minimum acceptable levels of service required for each deliverable requirement. These thresholds are critical to mission success.

V. PERFORMANCE EVALUATION

Surveillance In addition to deliverables performance surveillance, the Government COR will evaluate Contractors programmatic and technical services required by the PWS/WD to ensure compliance. This will be conducted through periodic inspections and Government Customer feedback.

Standard 90% of the PWS/WD requirements, excluding deliverables as listed in above table, will be satisfactorily completed without rework and no greater than 2 customer complaints in a 6-month period will be received.

Procedures The COR (in concert with FTRs) will inspect all work required by the PWS/WD to ensure Contractor has complied with the appropriate contract requirement each time the programmatic or technical service is performed. The COR/FTR will inform the Contractor project/program manager of documented deficiencies for correction. The Contractor shall be given a reasonable amount of time after notification to correct the deficiencies.

Periodic Inspection Monthly periodic inspections shall be conducted in the areas of program management, technical performance monitoring, and deliverables quality. Periodic inspections are other than 100% or random basis types.

Customer Feedback The COR will routinely communicate with Government HBCT Customers to assess contractor performance progress. This requires communication records and written satisfactory assessment or compliant documentation which is a valuable supplemental input to contracting monitoring and past performance assessments.

Surveillance Worksheet Monthly surveillance worksheets will contain:

- a. Date and Location of Inspection
- b. Period Covered
- c. Areas Covered (cost, schedule, and performance indicators, listing PWD/WD paragraphs)
- d. Overview of Performance (summary, communication, and documentation)
- e. Performance Analysis (performance as monitored, positive and negative performance areas)
- f. Areas of Concern
- g. Additional Information

Complaint Record Prior to the start of the contract start, the COR will instruct Government HBCT Customers how the customer complaint process works. Government customers are requested to register complaints with the COR as soon as possible after either experiencing or discovering a discrepancy.

The discrepancy information will be written in clear and concise terms. The complaint submitted to the COR shall contain the following:

- a. Date and Time of Complaint
- b. Source of Complaint (Name and Organization)
- c. Nature of Complaint (Narrative Description)
- d. Contract Reference of Complaint Related Services (Page and Paragraph Number)

COR will record:

- e. Date and Time COR Informed Contractor of Complaint
- f. Action Taken by Contractor
- g. Date Closed

The COR must validate the complaint by verifying that the service was required and that the standard was not met by the Contractor.

Once the COR is satisfied that a complaint is valid, he/she will:

1. Notify the Contractor of the discrepancy
2. Request a reply from the Contractor, within 15 days of notification. The Contractor response should address root cause, proposed corrective and prevention action.
