

**SOFTWARE MAINTENANCE AND UPGRADE PLAN:**

1. Provide a description of the secure mechanism for software maintenance and upgrade.
2. Include a description of the means your firm will provide to maintain and certify the security features of the software required by the Tactical Router Specification.
3. Provide a description of provisions to train operators and system configuration specialists on new provisions and features of upgraded software.
4. Section L.6.12 requires a proposed lot price for annual software maintenance.
