

HMEE-I Special Tool Kits Solicitation (W56HZV-13-R-0248) Question and Answer (Q&A)

Q1. C.1.1 states no substitutions for like items will be allowed; however, based on past performance efforts, we are of the opinion that many of the items required in Attachment 0001 have many alternatives that would increase value to the government's equipment. For instance there are numerous U.S. manufacturers offering industrial quality impact sockets, crow's feet, adapters, etc....

A1. The Government is currently reviewing this question. The closing date will be extended via an amendment to the solicitation to allow the Government time to review the question and contemplate a possible future amendment to allow for "Brand Name or Equal" tools.
