1 Purpose and Scope

1.1 Purpose

1.1.1 The purpose of this contract is for the contractor to provide corrosion engineering and logistics technical, analytical, programmatic, research and development, training, testing and technical writing support for the Tank Automotive Development Engineering Center (TARDEC) and TACOM Life Cycle Management Center (LCMC). The effort provided shall include independent analysis and assessment of TACOMs program to help administer the Army Corrosion Prevention and Control (CPC) Program for corrosion prevention, detection, and mitigation practices during sustainment and in support of TARDEC's technical objectives.

1.2 Scope

1.2.1 The Contractor, as an independent contractor and not as an agent of the Government, shall provide engineering and logistics analytical support to include field assessments, inspection, technology assessment, testing, training, technical writing, engineering changes, acquisition support, and research and development (R&D) services to TARDECs Materials, Environmental, and Corrosion Team to execute assigned programs and functions. These programs and functions support the Army Corrosion Prevention and Control (CPC) program, Corrosion Engineering Support for ground systems managed by PEO CS & CSS, PEO GCS and Life Cycle Sustainment support for the TACOM Integrated Logistics Support Center (ILSC). These services support Army Force Generation (ARFORGEN) and RESET efforts.

1.3 Background

1.3.1 Army Regulation 750-59 assigns to the Commanding Generals of Life Cycle Management Commands (LCMCs) the responsibility to administer the Army Corrosion Prevention and Control (CPC) Program. The TACOM CPC Program Manager and the U.S. Army Tank-Automotive Research, Development and Engineering Center (TARDEC) have been assigned to manage the program. The program creates cost effective product and process improvements to reduce vehicle maintenance costs and improve fleet readiness. The Army CPC program addresses use of materials and processes to prevent corrosion during weapon system and infrastructure design, production, maintenance and disposal; collects/analyzes data on the current state of the fielded fleet; performs demonstration/validation engineering studies for new processes and materials; and supports the institutionalization of improved corrosion prevention and control as a means to reduce life-cycle costs for legacy weapon systems and new acquisition programs. Under the revised Army Regulations, emphasis is placed on corrosion assessment, training, technical support, logistics for prevention and control materials and methods and research, development, testing and engineering (RDT&E) programs on materials and procedures.

2 REQUIREMENTS

2.1 General - The contractor shall provide qualified personnel, equipment, supplies, facilities, transportation, tools, services, materials, supervision, and other items and non-personal services necessary to perform services as defined in this Performance Work Statement (PWS). As required, the Contractor may also be provided items specified as Government furnished property and services in accordance with (IAW) task orders (TOs) issued by the Procuring Contracting Officer (PCO) under this contract.

2.2 Life Cycle Sustainment - The Contractor shall support the TACOM LCMC CPC Program Manager and the TARDEC Materials, Environmental and Corrosion Team in the performance of their respective CPC duties as described in AR 750-59. This support shall include platform specific corrosion problem resolution for fielded Army Ground Vehicles, insertion of CPC into overhaul programs, field level vehicle assessments and surveys, data collection, analysis, evaluation of field activity CPC plans, platform specific corrosion training, updates to technical manuals and documentation to support maintenance, procurement and application of paints and coatings as it relates to corrosion prevention and control.

2.2.1 Survey Teams - The Contractor shall assemble a traveling assessment team as an independent team to participate with representatives from AMC LCMCs and RDECOM in CPC surveys. The Contractor shall develop a strategy to collect representative corrosion data from field vehicles. The strategy shall employ statistical sampling or other means to identify corrosion trends on US Army vehicles and equipment by variant, location and across the entire vehicle population. The team will include corrosion engineers capable of gathering and analyzing data indicative of class problems for proposed engineering remedies (ECP). The results will be used to identify and report corrosion-prone areas of Army weapon systems (for example, vehicles, aircrafts, and trailers) in order to determine the cause of the corrosion problem CDRL A002.

2.2.2 Data Collection & Analysis The Contractor shall collect and analyze data on fielded ground weapon systems using existing assessment tools for the purposes of tracking corrosion progression. The data shall allow for trend analysis and isolation of problem areas for possible redesign. The data shall also support identifying corrosion issues for maintenance and storage methods. The Contractor shall also develop or upgrade assessment tools to meet the specific needs for engineering studies, research programs and

Name of Offeror or Contractor:

recommendations for new acquisition programs, maintenance and technology insertion.

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals--

(1) ___ Are, ___ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ___ Have, ___ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

Name of Offeror or Contractor:

any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ___ Have, ___ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). [The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at 22.1503(b).]

(2) Certification. [If the Contracting Officer has identified end products and countries of origin in paragraph (i)(1) of this provision, then the offeror must certify to either (i)(2)(i) or (i)(2)(ii) by checking the appropriate block.]
