Warren, MI 48397-5000

The following documents form a part of this scope of work:

1. TM 750-254, dated March 1972
2. TM 9-2320-272-24-3, dated June 1998
3. Functional Test.
4. Attachment 001, Drawings: 11669165 Sheets 1-4,
5. Attachment 002, Test Certification.
6. Attachment 003, Points of Contact.
7. Attachment 004, Special Packaging Instruction. (DD Form 2169)

III. Requirements:

A. Radiator Cleaning and Inspection

1. Refer to TM 750-254 for cleaning and inspection procedures.
2. Clean and inspect the radiator to determine extent of repair required.

B. Radiator Disassembly/Assembly

1. Refer to TM 9-2320-272-24-3

C. Radiator Repair / Replacement Procedure

1. All radiators are visually inspected for fin erosion, cracks at solder joints, damage to core, and or tanks to determine if the radiator is repairable.
2. If the radiator appears to be repairable the next step is to power flush and steam clean the radiator.
3. The radiator is then flow tested to determine if the flow is possible.
4. The radiator is then pressure tested under water at 25 PSI.

Name of Offeror or Contractor:

5. At this point if the leaks are repairable, the radiator is solid, and has good flow, a repair can be initiated.

D. Reasons for not being able to repair a Radiator

1. External fin corrosion.

2. External damage to core.

3. Radiator continues to remain plugged inside after power flushing.

4. Internal core leaks in radiator. This is when the tubes of the core have begun to corrode, normally caused by age, poor maintenance of anti-freeze, climate - salt, or electrolysis.

5. Split tubes. This is usually caused from age of core, a radiator that is subjected to constant high pressure and heat, and in vehicle accidents.

6. If the amount of the repair will exceed the amount of replacement.

Upon completion of repair, you will do a functional test on all radiator specified in paragraph K of this Scope of Work. After testing, you will complete Test Certification-Attachment 002. Forward completed certifications to:

G. Shipment

Equipment shall be prepared for shipment as instructed in packaging data sheet.
Shipment shall be accomplished in accordance with terms of the contract.

H. Storage

1. Preparation of Equipment: Equipment shall be prepared for storage as instructed in applicable packaging data sheets. Storage shall be accomplished in accordance with terms of the contract.

2. Preservation During Interim Storage: During interim storage at the contractor's facility, parts which are subject to deterioration or corrosion shall be cleaned and preserved by methods which will protect against such damage.

I. Marking

In addition to any special marking requirements annotated on the SPI, all unit packages, intermediate packs, exterior shipping containers and unitized loads shall be marked in accordance with MIL-STD-129, Revision P, Dated 15 Dec 2002, including bar coding as applicable.

1. The repair facility is responsible for application of special markings as discussed in the Military Standard regardless if specified within applicable contract or purchase order or not. Special markings include, but are not limited to, shelf-life markings, structural markings, and during transportation, special handling markings. The marking of pilferage and sensitive materiel will not identify the true nature of the materiel.

Name of Offeror or Contractor:

2. The repair facility shall apply identification and address markings with bar codes in accordance with this standard.

3. Military Shipment Label (MSL) is required for all shipments except from contractor to contractor. The MSL will include both linear and 2D bar codes per the standard. MSL may be created using the Computer Automated Transportation Tool MSL / Issue Receipt Release Document (CATT MSL/IRRD). See the web site: <http://www.asset-trak.com/catt/catt.htm>. The software may be downloaded from the web site at http://www.asset-trak.com/catt/msl_irrd/msl_irrddownload.htm. Be sure to bookmark this page for future releases of CATT MSL/IRRD.

J. Special Packaging Instructions

The SPI has been validated and the method of preservation and packing has proven successful in meeting the needs of the military distribution system, including indeterminate storage and shipment throughout the world.

Special instructions have been detailed in Attachment 004 of this text . A prototype package is required to validate the form, fit and function requirements of the SPI.

Minor dimensional and size changes are acceptable provided an email notification is provided to packaging@tacom.army.mil. Any design changes or changes in the method of preservation that provide a cost savings without degrading the original method of preservation or packing or affecting the serviceability of the item, will be considered and responded to within 10 days of submission to above email. USA TACOM reserves the right to require testing to validate alternate preservation methods, materials, blocking, bracing, cushioning, and packing.

K. Functional Test

1. General- Before testing a radiator to locate leakage, inspect it carefully for visible leaks and solder them promptly, so that the test will be sensitive enough to reveal less obvious defects. There are two standard methods of testing one by introducing air (under light pressure) into the radiator, immersing it in water, and locating the leaks by the appearance of bubbles, and the other, by filling the radiator with water and locating the leaks through the moisture seeping through. Either test is satisfactory, although the air test method is preferred. Mark the leaks as soon as found to facilitate locating them during repairs.

2. Visual Inspection - Inspect outside surfaces of radiator for deposits of lime or magnesia, which is left by evaporating water and indicates leaks. Do not attempt to make an air water test until all the leaks indicated by visual inspection have been repaired.

3. Air Leak Test**WARNING**

The operating pressure of cooling systems is being progressively increased and some exceed 15 psi. When testing at pressures of more than 15 psi, the push-on rubber caps and plugs may blow off. To prevent this danger, clamps or wires should be used for holding those plugs or caps firmly.

CAUTION

Never attempt to air test a radiator with a direct air hose from the usually available 125 psi air source always use regulated air pressure.

NOTE

Before leak testing, the inside of the radiator should be thoroughly dry.

a. Examine the radiator tanks, core and fittings for physical damage and for large obvious leaks. Repair these obvious leaks before air testing.

b. Attach a filler neck adapter plug (Filler Neck Tester with air connection) to the filler neck of radiator. The adapter must seal the filler neck opening the same as the radiator cap but must provide a means of applying compressed air through a hose connection in the filler neck adapter.

c. To leak test a radiator and locate leaks, the radiator is submerged in a tank of water. Most radiators are tested at approximately 15 psi. An air pressure regulator and a low pressure gage is required for air pressure control.

NOTE

Radiators are tested at pressures of 3 psi above the maximum operating pressure.

d. Seal all other radiator openings with push-on rubber caps or plugs.

e. Apply regulated air pressure to the radiator before submerging in test tank.

NOTE

Pressure is applied to radiator before submerging to prevent water from entering the inside of radiator through any leak.

f. With test air pressure applied, lower radiator slowly into test tank while observing for air bubbles.

g. Mark the source of the leak with scribe or other satisfactory means.

Name of Offeror or Contractor:

- h. Some leaks are difficult to locate because of bubble deflections by the core fins. Lowering and raising slowly or reducing air pressure will have advantages for locating some difficult leaks.
- i. To find very small leaks, place the bench light in back of the radiator so that the interior of the core can be seen. Stand the radiator on the bench, and spread the supposed leak with flux or soapy water from an eyedropper, oil can, acid brush, or swab. Compressed air seeping through the leak will cause the liquid to foam
- j. The number of leaks and their location and the general condition of the radiator will determine the advisability of repairing.
- k. The leak test is conducted many times during most repairs and requires raising and lowering the radiator each time.
- l. In some cases a new core may be recommended when there are a large number of leaks or the core shows deterioration.

4. Water Test

- a. General - The water test, so called because leaks are indicated by escaping water, replaces the air test when equipment is limited or supplements it when the air test is suspected of being inadequate. Sediment and lime deposited about leaky joints may be forced into the joints by air pressure when the radiator is air tested; sealing the leak Leaks at the joint of tubes and header plates often refuse to show up under air pressure.
- b. Test Procedure
 - (1) Dry radiator after repairing leaks found by air pressure, and test by water method.
 - (2) Remove plug from filler neck and fill radiator with water, being careful not to run it over or spill on the outside.
 - (3) Examine core carefully for leaks.
 - (4) Place air hose over lower end of overflow tube and hold palm of hand over filler neck, while a 5-pound pressure passes in against the water

GUARANTEED SHIPPING CHARACTERISTICS

DEC/1989

(a) The offeror is requested to complete subparagraph (a)(1) of this clause, for each part or component which is packed or packaged separately. This information will be used to determine transportation costs for evaluation purposes. If the item shipping costs, based on the actual shipping characteristics, exceed the item shipping costs used for evaluation purposes, the Contractor agrees that the contract price shall be reduced by an amount equal to the difference between the transportation costs actually incurred, and the costs which would have been incurred if the evaluated shipping characteristics had been accurate.

(a) Definition. HUBZone small business concern, as used in this clause, means a small business concern that appears on the List of Qualified HUBZone Small Business Concerns maintained by the Small Business Administration.

(b) Evaluation preference.

(1) Offers will be evaluated by adding a factor of 10 percent to the price of all offers, except-

(i) Offers from HUBZone small business concerns that have not waived the evaluation preference;

(ii) Otherwise successful offers from small business concerns;

(iii) Otherwise successful offers of eligible products under the Trade Agreements Act when the dollar threshold for application of the Act is exceeded (see 25.402 of the Federal Acquisition Regulation (FAR)); and

(iv) Otherwise successful offers where application of the factor would be inconsistent with a Memorandum of Understanding or other international agreement with a foreign government.

(2) The factor of 10 percent shall be applied on a line item basis or to any group of items on which award may be made. Other evaluation factors described in the solicitation shall be applied before application of the factor.

(3) A concern that is both a HUBZone small business concern and a small disadvantaged business concern will receive the benefit of both the HUBZone small business price evaluation preference and the small disadvantaged business price evaluation adjustment (see FAR clause 52.219-23). Each applicable price evaluation preference or adjustment shall be calculated independently against an offeror's base offer. These individual preference amounts shall be added together to arrive at the total evaluated price for that offer.

(c) Waiver of evaluation preference. A HUBZone small business concern may elect to waive the evaluation preference, in which case the factor will be added to its offer for evaluation purposes. The agreements in paragraph (d) of this clause do not apply if the offeror has waived the evaluation preference.

[] Offer elects to waive the evaluation preference.

(d) Agreement. A HUBZone small business concern agrees that in the performance of the contract, in the case of a contract for

(1) Services (except construction), at least 50 percent of the cost of personnel for contract performance will be spent for employees of the concern or employees of other HUBZone small business concerns;

Name of Offeror or Contractor: _____

- (2) Supplies (other than procurement from a nonmanufacturer of such supplies), at least 50 percent of the cost of manufacturing, excluding the cost of materials, will be performed by the concern or other HUBZone small business concerns;

- (4) Construction by special trade contractors, at least 25 percent of the cost of the contract performance incurred for personnel will be spent on the concern's employees or the employees of other HUBZone small business concerns.
- (e) A HUBZone joint venture agrees that in the performance of the contract, the applicable percentage specified in paragraph (d) of this clause will be performed by the HUBZone small business participant or participants;
- (f) A HUBZone small business concern nonmanufacturer agrees to furnish in performing this contract only end items manufactured or produced by HUBZone small business manufacturer concerns. This paragraph does not apply in connection with construction or service contracts.

Data shall be submitted in accordance with Federal Standard No. 313, whether or not the apparently successful offeror is the actual manufacturer of these items. Failure to submit the Material Safety Data Sheet prior to award may result in the apparently successful offeror being considered nonresponsible and ineligible for award.
- (e) If, after award, there is a change in the composition of the item(s) or a revision to Federal Standard No. 313, which renders incomplete or inaccurate the data submitted under paragraph (d) of this clause, the Contractor shall promptly notify the Contracting Officer and resubmit the data.
- (f) Neither the requirements of this clause nor any act or failure to act by the Government shall relieve the Contractor of any responsibility or liability for the safety of Government, Contractor, or subcontractor personnel or property.
- (g) Nothing contained in this clause shall relieve the Contractor from complying with applicable Federal, State, and local laws, codes, ordinances, and regulations (including the obtaining of licenses and permits) in connection with hazardous material.

<u>Spec/Standard</u>	<u>Required CIODS</u>	<u>Substitute Available?</u>
_____	_____	_____
_____	_____	_____

(e) Offerors who check have in paragraphs (d)(1) or (2) above also are requested to say whether substitutes are known to be available for any of the CIODS. If an available substitute would perform less well than the CIODS would perform, please let us know what the technical trade-offs are to the extent that you have such information available.

(f) If you checked have in paragraphs (d)(1) or (2) above, and also indicated that substitutes for CIODS are available, we need to know whether use of the suggested substitute would have any effect on your proposed price. If your proposal price for compliance with our current specifications differs from what your price would be if the substitute for CIODS were required, we ask that you let us know what the difference would be in Section B of this solicitation, by giving us two prices or offers:

--One price/offer, labeled with CIODS, will be the offered price in the event that CIODS are used.

--The second price/offer, labeled without CIODS, will be the price offered if substitutes for CIODS are used, and will specify the substitute(s) being proposed for use.

(g) Section 326 of Public Law 102-484 reflects the national and international interest in minimizing the use of CIODS. For this reason, TACOM reserves the right to (i) determine the suitability of substitutes for CIODS when such potential substitutes are available; and (ii) change the specification in any contract awarded as a result of this solicitation, to require the use of suitable substitutes in lieu of CIODS.

L-16 52.215-4404 DATA AND COMMUNICATIONS SUBMITTED TO THE GOVERNMENT ELECTRONICALLY MAY/2002

These systems include local area networks, web sites, databases, other electronic records, e-mail accounts, other electronic data transfer mechanisms and computer software. The employees of these contracted system administrators sign nondisclosure agreements obligating them not to reveal information contained in files, documents, computers or systems that they administer. Absent such steps, it is assumed that contracted system administrators are permitted the capability to access the data. The access will be limited to that which is necessary for the contract system administrator to perform its duties for the Government. The access shall be subject to the condition that third party information is not to be revealed by the contracted system administrator.

You must submit your electronic offer, and any supplemental information (such as spreadsheets, backup data, and technical information), using any of the following electronic formats:

(1) Files readable using these Office XP or Microsoft* 2002 Office Products (TACOM can currently read OFFICE 2002* and lower.): Word, Excel, Powerpoint, or Access. Before preparing your offer in any other electronic format, please e-mail the buyer identified in Block 10 of the solicitation cover sheet (Government Standard Form 33), with e-mail copy-furnished to amsta-idq@tacom.army.mil, to obtain a decision as to the format's acceptability. This e-mail must be received by the buyer not later than ten calendar days before the closing date. Failure to e-mail the buyer within this timeframe to seek an alternate format's acceptability may result in rejection of your offer. All alternate methods must be at no cost to the Government.

NOTE (Compression): The above formats may be submitted in compressed form using Winzip*. Self-extracting files are not acceptable. Check with the buyer before using any product other than Winzip for file compression.

NOTE (Hyperlinks): Documents [submitted using any of the above formats] must not contain active links (hyperlinks) to any other documents that are not contained in the proposal. This includes links to live Internet web sites or web pages. All linked information must be contained within your electronic offer and be accessible offline.

NOTE (Macros): The virus scanning software used by our email systems cannot always distinguish a macro from a virus. Therefore, sending a macro embedded in an email message or an email attachment may cause the email offer to be quarantined. In that event subparagraphs (f) and (g) apply.

(b) Acceptable media: You must submit your offer via 100 megabyte or 250 megabyte Zip*-disk, or 3 1/2 inch disk, or 650 megabyte CD ROM, E-mail, or datafax. Notwithstanding language in Block 9 of the SF 33 cover sheet of this solicitation that may state otherwise, submit ONLY ONE (1) of each disk (no additional copies required). THE SUBJECT LINE OF THE E-MAIL MUST READ: "OFFER--[solicitation number], [name of Company/offeror], CLOSES [closing date]". Maximum size of each e-mail message shall be three and one-half (3.5) megabytes. Use the file compression described in the NOTE in paragraph (a) above. You may use multiple e-mail messages for each offer/submission, however, you must annotate the subject lines as described above for each message, and number them in this manner: "Message 1 of 3, 2 of 3, 3 of 3".

Paper faxes are not acceptable. Transmit only one offer for each datafax transaction. Clearly identify the offer as such on your fax cover page or via your PC, include your company's name, and state the proper internal TACOM address: offers@tacom.army.mil. Offerors may send a fax using a personal computer or standalone fax machine, but it must be sent to the above number. If you use a standalone fax machine, you won't receive a confirmation of receipt. See paragraph (e) below for the minimum requirements of your offer. Maximum size of datafax offers is three and one-half megabytes (3.5MB), the same limitation as that for e-mail offers. For your datafax, use the same subject line as that for e-mails as indicated above: "OFFER--[solicitation number], [name of your Company/offeror], CLOSES [closing date]".

Unless specifically instructed otherwise in this solicitation, select only one medium by which to transmit each offer. For instance, do not submit an offer via 100 or 250 megabyte Zip*-disk AND e-mail.

(c) Lateness rules for submitted disks, e-mail, or datafax submissions are outlined in FAR 52.215-1, "Instructions to Offerors--Competitive Acquisition", listed in Section L of this solicitation. Pay particular attention to paragraph (c)(3) of that clause as it relates to the timing of e-mail or datafax submissions.

(d) Security Note: If you choose to password-protect access to your offer, you must provide the password to TACOM at least ten days prior to submitting the protected file. Clearly label the disc/CD ROM as described in paragraph (b)(1) above, adding the name and title of the signer authorizing your company, your company name, and then sign the LABEL itself. Datafaxed offers also must include a signed SF 33 cover sheet. E-mailed offers must also include a signed SF 33 cover sheet that can be either faxed or scanned. If faxed to the TACOM Network Fax Server (1-586-574-5527), you must annotate that it is being submitted together with your e-mailed offer. If scanned, attach it to your e-mail offer (or first e-mail message if you are sending multiple e-mails due to length).

(2) All applicable fill-in provisions from Sections A, B, F, and K of this solicitation. You may find Word versions of Section K provisions requiring your fill-in on our TACOM Business Opportunities webpage (<http://contracting.tacom.army.mil/mastersol/sectionk.htm>). You can fill them in and attach them to your offer. See the solicitation for which provisions are required. Also, Section E provisions filled in (if applicable): Inspection Point: Origin, TACOM clause 52.246-4028. All applicable fill-ins must be completed and submitted by the offeror.

(3) A statement of agreement to all the terms, conditions, and provisions of this solicitation.

(4) Computer Automated Transportation Tool (CATT). The following website provides detailed instructions for downloading and installing the Military Shipment Label/Issue Receipt Document (CATT MSL/IRRD) software that will generate a Military Shipping Label to include the required Code 39 and 2D(PDF417) bar codes on the label: <http://www.asset-trak.com/catt/msl_irrd/mslirrdmain.htm> This program was developed by the Army and is free to those with government contracts. Two contractors have introduced a version of the MSL software that can be purchased by contractors. Both programs produce labels that appear to be in compliance with the requirements of MIL-STD-129P. Contractors are MILPAC (<<http://milpac.com/>>) and Easysoft Corporation (<<http://easysoftcorp.com/>>). Ensure that the ship to and mark for in-the-clear delivery address is complete including: consignees name, organization, department name, office, building, room, street address, city, state, country code, & DODAAC.

Each box/pallet shall be marked to show the conformance to the International Plant Protection Convention Standard. The quality mark shall be placed on both ends of the outer packaging, between the end cleats or end battens; on two sides of the pallet.
