

# Attachment 027

## **Request for Use of Prohibited Materials**

**04 June 2012**

# Attachment 027

1. General Information	
Requesting Company	
Date of Request	
Point of Contact	
AMPV Prohibited material for which waiver is requested	
2. Explanation of Use	
<i>Instructions: Provide a description of the parts/processes where the prohibited material will be used. Identify all components/parts which will contain the prohibited materials upon vehicle delivery. Indicate the specific variant(s) the components/parts are on. Identify whether or not the material will be required for operation or maintenance (including during vehicle rebuild). A separate spreadsheet may be attached listing the specific parts/processes, if needed.</i>	
3. Health Hazard	
<i>Instructions: Provide an explanation of any health hazards associated with the use or presence of the prohibited material. Include likely routes of exposure to both the operator and the maintainer. Identify if any personal protective equipment (PPE) would be required as a result of using this material. Include the type of PPE and under what circumstances it would be required (manufacturing, operation, maintenance, etc.).</i>	
4. Analysis of Alternatives	
<i>Instructions: Identify all alternatives which were considered for the prohibited material. If the alternative is only for specific applications, identify what type of parts it is a potential alternative for. Include explanation as to why each cannot be implemented.</i>	

# Attachment 027

<b>5. Technical Justification</b>
<i>Instructions: Provide technical justification for the use of AMPV prohibited material. Explain why it is necessary and why it cannot be eliminated.</i>
<b>6. Program Risk</b>
<i>Instructions: Describe the program risk(s) (cost, schedule, and performance) associated with denial of this request by the Government.</i>
<b>7. Get Well Plan</b>
<i>Instructions: Explain if and how you would eliminate the use of this prohibited material during the production phase of the AMPV program.</i>
