Company:	SURVICE Engineering Company
Description:	SURVICE Engineering is a small, family-owned business focused on supporting Test & Evaluation, Modeling and Simulation, Metrology/Reverse Engineering, System Analysis and Engineering and Information Assurance efforts for the DoD. SURVICE has been doing business since 1981 and is a recognized expert in analyzing and testing system survivability. Our survivability expertise encompasses the full spectrum of threat weapons, weapon effects, and damage mechanisms, whether they be conventional, nuclear, chem-bio, radiological, electronic (directed energy and electronic warfare), or cyber. SURVICE maintains offices in the following states which are located near major military installations: MI, MD, FL, OH, VA, AL and CA. SURVICE Metrology focuses on 3D scanning, reverse engineering, part inspection, comparative analyses, CT scanning, and custom metrology hardware and application development. SURVICE has world-class metrology facilities and technical staff with requisite training, certification, and experience to use a variety of precision dimensional inspection and CAD tools to model and/or certify parts, assemblies, fixtures, and payloads. SURVICE maintains a comprehensive suite of portable contact, structured-light, and laser-scanning technologies. We possess the capability, personnel, and facilities to use virtually all types of metrology, computed tomography, and reverse engineering equipment and software on the market, both at our facilities and at remote sites.

Company:	Bren-Tronics, Inc.
Description:	Bren-Tronics has over 40 years of experience in designing military power and energy systems. That experience includes products such as the US Army PP-8481B/U, and the Marine Corps VMBC, and other small charging systems ; all rugged charging systems used to recharge crew equipment batteries. Bren-Tronics is known in the military battery industry for the BB-2590/U, now the industry standard in rechargeable batteries. We have now brought that safety, quality, affordability, and short lead times to our Lithium Iron Phosphate version of the 6T.

**Company:	SKYDEX Technologies Inc
Description:	SKYDEX, a privately-held technology company headquartered in Denver, CO is the industry leader in developing protective materials that mitigate shock, vibration and energy forces for the most demanding military and commercial uses. Our technologically advanced innovations are proven in a wide range of military applications, including blast-mitigating flooring for combat vehicles, padding for military helmets, vibration-attenuating seating, and shock absorbing decking for high speed interceptor boats. Commercial applications include protective padding for sports equipment and athletic apparel, industrial and pleasure boat decking and personal protective equipment for the workplace. SKYDEX clients are government and commercial entities that value reducing the probability of injury and increasing the survival rate for their most important assets – their employees. Inspired by its motto – “Protecting Things That Matter” – SKYDEX offers a customizable technology with superior performance to enhance the effectiveness of products that are manufactured to protect.
