16. REMARKS Block 4: The CDRL shall demonstrate auditable estimates for expected Production & Deployment (P&D) phase manufacturing costs based on the Family of Vehicles (FoV) concept and the Contractor's delivered designs. The CDRL shall be delivered in the Government provided Manufacturing Cost Estimate Template (Attachment 0006), utilize the Government ground rules and assumptions, MIL HDBK 881A WBS element definitions, CWBS dictionary, delivered prototype designs, and when available the actual prototype costs as the basis of the following: <ul style="list-style-type: none"> • Auditable P&D Phase Estimates for expected manufacturing costs based on the FoV concept to include non-recurring and recurring production costs for each JLTV sub-configuration, trailer, and auxiliary equipment/kit. • Methodology and Documentation that explains the estimating process, the results of the estimate, and when available the relationship between the estimated manufacturing costs and the actual prototype costs. Block 6: BusMgmt = Government Business Management Office Block 9: The Government requires a distribution statement on this data and the Contractor shall contact the IPT lead identified in Block 6 ten days prior to submission of data to obtain distribution statement information. Block 10: One scheduled, one additional data call may occur. Block 11: The Manufacturing Cost Estimate must reflect the final EMD vehicle configurations (incorporating all ECPs post final Test Corrective Action Period (CAP)). Block 12 and 13: First submission - post Test CAP2 + 60 calendar days. An additional data call may occur at the discretion of the Government. The Contractor shall deliver the Manufacturing Cost Estimate within 60 calendar days of the data call. An informational copy of the estimate and report is to be provided for review two weeks prior to each submission. The Contractor shall report on and provide an overview of the manufacturing cost estimates to the Government at TRR meetings.					SEE BLK 16	1		1

16. REMARKS Block 4: In addition to the contents of the DID, The primary purpose of the cWBS Dictionary is to explicitly detail the efforts and costs captured in each WBS element. Change to the CSDR Contract Plan WBS Index, at any reporting level, requires the approval of the Government. The Dictionary structure shall include all elements in the CAPE approved CSDR Contract Plan indentifying the: 1) Element number 2) Element name 3) Element description The element description content shall not be a duplication of MIL-HDBK-881A, which is intended only as a guide, except in cases where the Contractor anticipates zero incurred costs at completion in which case a verbatim duplication is acceptable. Each element that is expected to have cost at completion must have a definition. These non-zero elements must also segregate the definitions according to recurring efforts vs. non recurring efforts in a way that clearly aligns with the cost report recurring vs. non recurring entries. The cWBS Dictionary will require updates and is not considered final until the final cost reports are accepted. The cWBS Dictionary will be updated concurrently with the cost reports for all submission events Block 6: BusMgmt = Government Business Management Office Block 10: Reference DI-MGMT-81334, Preparation Instructions, 2.c and OSD CAPE-approved CSDR Plan (Attachment 0005, DD Form 2794) Block 11: Reference DI-MGMT 81334, Preparation Instructions, 2.c and OSD CAPE-approved CSDR Plan (Attachment 0005, DD Form 2794) Block 12: A preliminary (Draft) version of the cWBS Dictionary is due within 60 days of the post award CSDR conference. In the absence of a conference, it is due within 60 days of contract award or contract modification. First submission reference DI-MGMT-81334 and OSD CAPE-approved CSDR Plan (Attachment 0005, DD Form 2794) Block 13: The Contractor shall maintain and update the cWBS and Dictionary throughout the period of performance. Subsequent submittals are required IAW DI-MGMT 81334, Preparation Instructions, 2.c and OSD CAPE-approved CSDR Plan (Attachment 0005, DD Form 2794)				SEE BLK 16	1		1

16. REMARKS Block 4: In addition to the content of the DID, Certifications are required as a one-time submission (i.e. not required for each vehicle) for all Purchase Description line items that indicate "Certification" as the method of requirement verification. Certifications are defined as contractor-furnished documents certifying compliance with the specific Section 3 requirement criteria. Certifications shall be from organizations not affiliated with the Contractor (i.e. 3rd party). Certification organization shall be accredited for testing and certification to the standard/specification referenced in the Section 3 requirement criteria. Presence of a Certification Mark on the product from such an organization is acceptable evidence of certification. In cases where the Contractor uses a Certification Mark to show evidence of certification compliance for a particular PD line item, a notation shall be made as part of this CDRL, with the PDFOV line items referenced. For all other Certifications, the following information shall be included as part of the Certification: 1.The name of the organization issuing the certificate 2.The standard or specification that the above organization is certifying the item to 3.The date of certification Block 6: SE = Government Systems Engineering Integrated Product/Process Team Block 12: Certifications are due concurrently with the submission of the Final Inspection Record (FIR) for the first vehicle of each variant. 16. REMARKS Block 4: In addition to the content of the DID, The Contractor shall provide, as necessary to effectively identify root cause, and develop corrective action, the following FACAR supporting information: test data, supplier data/analyses, updated FMEA's and Fault Tree Analyses (FTA'S) certifications, drawings, photographs, and illustrations. This information shall be submitted in .pdf format in conjunction with the ASCII Corrective Action data stream. To track multiple source documents related to a single FACAR, the file name shall be composed of a sequential FACAR numbering system (FACAR # - Version # .pdf). For example: L5-XXXXXXX-A.pdf ----- 1st document L5-XXXXXXX-B.pdf ----- 2nd document L5-XXXXXXX-C.pdf ----- 3rd document Functional Block Diagrams shall be included with all FACARs. For all Critical and Major TIRs, FACARS shall include subsystem testing to responses as substantiating evidence. For FACAR revisions, data blocks shall list any additional Supporting Documentation with the new file name. Block 6: T&E = Government Test & Evaluation Integrated Product/Process Team Block 12 and 13: FACARs shall be provided for all Critical and Major TIRs. Minor and Information TIRs shall be addressed by Contractor as requested by the Government. All FACARs shall be submitted within the timeframes required in Section C.19.2. Block 14: With the exception of supporting documents, all required text shall be submitted to ATIRS (ATIRS@atc.army.mil). Following the first FACAR submission, the Contractor shall confirm that submitted Corrective Action data streams have been converted to permanent VDLS FACARs to assure system compatibility and smooth processing of emailed data deliverables. The Government CART Chairperson shall be notified of submitted Corrective Action data streams that have not been loaded in VDLS. Repro = electronic copy					SEE BLK 16	1		1

16. REMARKS							
Block 4:							
The Quality Scorecard shall include, at a minimum, the following information:							
<ul style="list-style-type: none"> • Tests completed vs. scheduled, including acceptability of results • Breakout of critical subsystem verification/validation activity results (including acceptability of results) • FMEA's created and/or reviewed and approved vs. plan • FACARs completed vs. requested • Build process documentation completed vs. scheduled (e.g. work instructions, control plans, process flows, etc.) • Production metrics (e.g. cycle times, defect measurables, scrap rates, yields, personnel competencies vs. required, etc.) • Error/mistake proofing activity status (e.g. workstation-by-workstation summary of error/mistake proofing review and implementation plan status) • Action plans for instances where results not meeting targets 							
The Contractor is encouraged to add any other metrics to the Quality Scorecard as needed to ensure key quality indicators are kept visible to drive action as needed							
Block 12: Initial Submission is due at SOWM/SRR							
Block 13: Updated submissions are due at TRR and PRR.							
Block 14: Quality Scorecard shall be submitted electronically to the Advanced Collaborative Environment (ACE). The Government IPT lead shall be notified when the data has been submitted. All submissions shall be prepared and delivered in an editable and current Microsoft Office software suite file format (MS Word, MS Excel)

8. APP CODE N/A		11. AS OF DATE N/A	13. DATE OF SUBSEQUENT SUBMISSION SEE BLK 16									
16. REMARKS Block 4: The AIC Plan shall be provided with the following Content and Format: 1 Executive Summary. The Contractor shall provide a summary of the AIC Plan and highlight any currently known or assumed benefits and advantages or disadvantages of utilizing Australian Industry within the JLTV program in future production and sustainment phases. 2 AIC Plan. The Contractor shall create a feasible and realistic plan that outlines strategies on how to investigate the potential for Australian Industry involvement in the production and sustainment of the JLTV on a cost effective and best value basis. (*Note: The Contractor shall not implement, nor incur any cost to implement, this AIC Plan in the performance of this contract). The Contractor's AIC plan may address any of the following activities in which it could investigate potential Australian Industry involvement: a. Repair, maintenance and sustainment activities in Australia for the life of the Australian Right Hand Drive JLTV fleet; b. Post-production system modification, systems and equipment adaptation, and potential new solutions for the life of the Australian Right Hand Drive JLTV fleet c. Development and sustainment (to include hardware and software) for JLTV d. Identification of opportunities for Australian Industry to bid on prime Contractor's internal JLTV related best value source selection(s) for participation as a sub-Contractor; e. Assistance and provision of training to Australian companies in how to do business with the Contractor, to enable them to bid on a prime Contractor's internal JLTV related best value source selection(s) for participation as a sub-Contractor; f. How the Contractor could, if willing, establish an industrial participation process that allows for timely notification of Australian companies of information on and opportunities to bid on Contractor's internal JLTV related source selection(s); g. JLTV assembly or production in Australia; h. Plans and detailed strategies on how to research potential involvement of Australian industry in the JLTV supply chain during future production and sustainment phase. 3 AIC Management. For each area of activity within the AIC Plan, the Contractor shall outline a management approach and identify any infrastructure and resources that would be required to implement the actions/investigations cited in the Contractor's AIC plan. 'Resources' is defined as labor, any direct/indirect charges, and an overall total cost. (*Note: The Contractor shall not implement, nor incur any cost to implement, this AIC Plan in the performance of this contract).					a. ADDRESSEE	b. COPIES		Reg	Final Repro
