<b>Company</b>	Wamar Technologies LLC
<b>Description</b>	Wamar Technologies manufactures the highest quality specialized armored vehicles available. Modified from existing commercial vehicle platforms such as the Ford Excursion and designed to maintain an external OEM appearance, these armored vehicles are tactical in nature, ruggedized, and equipped with heavy duty components to meet the demands of austere environments in Iraq and Afghanistan. Wamar Technologies Advanced Technology group brings C4ISR hardware and software integrations to its mobility platforms and; the company has a global logistics capability, within its Service, Parts and Logistics (SPLO) department. This expansion of the services, parts, and logistics arm not only gives WT the ability to support and maintain operations in its existing areas of operation, but gives it the ability to establish new support and production facilities anywhere around the globe. Combined, these capabilities allow Wamar Technologies to offer a comprehensive set of turn-key solutions to the defense, security, disaster preparedness and relief, as well as the humanitarian aid market sectors.

<b>Company</b>	RBC Bearings, Inc.
<b>Description</b>	RBC Bearings is a well known international manufacturer and marketer of highly engineered precision plain, roller and ball bearings. While we manufacture products in all major bearing categories, our focus is primarily on highly technical or regulated bearing products for specialized markets that require sophisticated design, testing and manufacturing capabilities. Our unique expertise has enabled us to garner leading positions in many of the product markets in which we primarily compete. Most of our products undergo lengthy and rigorous customer certification processes and/or approvals, while our aerospace and defense products generally require additional FAA and military certification (including DFAR compliance). RBC Bearings has been providing bearing solutions to our customers since 1919.

<b>Company</b>	Word Pictures, Inc.
<b>Description</b>	Since 1983, Word Pictures has developed effective communication solutions for clients ranging in size from small businesses to Fortune 500 companies. Decades of communications experience provide a "real-world" perspective in everything we do. We understand the dynamics and roles everyone must play to create compelling communication. Solutions for all media – and all phases of the development process – creation and development, revisions/editing, and delivery of final product. Simply, Word Pictures effectively communicates complexity. Specifically, regarding the JLTV LRIP and FRP, we are interested in the development of the manuals necessary to comply with the Integrated Product Support and Interim Contractor Support requirements under the RFP.
