In the early 1900s, Denver, Colo., had grown into a significant commercial city in the Western United States. Construction of a new federal building to serve the booming population began in 1910, and the building opened in 1916, occupying an entire city block in downtown Denver and standing four stories in height. The Byron R. White U.S. Courthouse reflects the academic characteristics of the neoclassical style with its symmetrical design, classical details, and imposing manner. [More»](#)

GSA Lends a Hand for the 2010 Census

For this year's census, GSA teamed up with the Department of Commerce to provide office space where census takers nationwide could work during the count of the U.S. population. Getting on Schedule

Under the [GSA Schedules Program](#), GSA establishes long-term governmentwide contracts that allow customers to acquire a vast array of supplies (products) and services directly from commercial suppliers.

To become a GSA Schedule contractor, a vendor must first submit an offer in response to the applicable GSA Schedule solicitation.

GSA awards contracts to responsible companies offering commercial items, at fair and reasonable prices, that fall within the generic descriptions in the [GSA Schedule Solicitations](#). Contracting Officers determine whether prices are fair and reasonable by comparing the prices/discounts that a company offers the government with the prices/discounts that the company offers to commercial customers. This negotiation objective is commonly known as "most favored customer" pricing. In order to make this comparison, GSA requires offerors to furnish commercial pricelists and disclose information regarding their pricing/discounting practices.

In order to fully understand the process involved in "Getting on Schedule," GSA recommends that all vendors take the [Center for Acquisition Excellence](#) online, self-paced training course, "How to Become a Contractor — GSA Schedules Program." The course describes:

- Various features of the GSA Schedules Program;
- How to submit an offer;
- The evaluation and contract award process;
- How to successfully market supplies and services; and
- Sources of information related to Schedule contract administration.

Multiple Award Schedule (MAS) Express Program

Vendors should consider submitting offers under the MAS Express Program, a specialized program established under the GSA Schedules Program. The goal of the MAS Express Program is to simplify, streamline, and ultimately accelerate the process for vendors to obtain Schedule contracts. Offers are currently being accepted under the MAS Express Program for selected Schedules. In order to participate in the MAS Express Program, vendors must meet specific criteria for certain products and services under these Schedules. Vendors must also successfully complete [Pathway to Success](#), an education seminar designed to assist prospective Schedule contractors in making an informed business decision as to whether obtaining a GSA Schedule contract is in their best interests.

Instructions for submitting offers under the MAS Express Program are included in the applicable Schedule solicitations. Additional information regarding the MAS Express Program is available by accessing the [Vendor Support Center \(VSC\)](#), locating the "Business Opportunities" tab, and selecting "MAS Express Program."

Submission of Offers: Paper or Electronic

As an alternative to the paper submission of offers, GSA has developed [eOffer](#), a web based application that allows a vendor to prepare and submit a Schedule offer electronically. eOffer is designed to create an interactive, secure environment that simplifies the contracting process from submission of offers to contract awards. eOffer uses the latest digital authentication technology to ensure the integrity of data and to electronically sign the offer. Digital certificates are required to use eOffer.

The [eOffer website](#) contains a variety of information regarding the eOffer application, including available training, information regarding digital certificates, and identification of those Schedules under which eOffers are currently being accepted.

Under the MAS Express Program, a vendor may prepare and submit an MAS Express offer electronically using "Express eOffer" or a traditional paper offer, but specifically designed for the MAS Express Program. The eOffer website provides

Category	Description
871 1	<p>Strategic Planning for Technology Programs/Activities - Services required under this SIN involve the definition and interpretation of high level organizational engineering performance requirements such as projects, systems, missions, etc., and the objectives and approaches to their achievement. Typical associated tasks include, but are not limited to an analysis of mission, program goals and objectives, requirements analysis, organizational performance assessment, special studies and analysis, training, and consulting. Example: The evaluation and preliminary definition of new and/or improved performance goals for navigation satellites such as launch procedures and costs, multi-user capability, useful service life, accuracy and resistance to natural and man made electronic interference. Contractors are awarded one or more of the following primary engineering disciplines (PEDs), under this Special Item Number: Chemical Engineering (CE) Civil Engineering (CI) Electrical Engineering (EE), Mechanical Engineering (ME)</p>
871 2	<p>Concept Development and Requirements Analysis - Services required under this SIN involve abstract or concept studies and analysis, requirements definition, preliminary planning, the evaluation of alternative technical approaches and associated costs for the development of enhancement of high level general performance specifications of a system, project, mission or activity. Typical associated tasks include, but are not limited to requirements analysis, cost/cost performance trade-off analysis, feasibility analysis, regulator compliance support, technology/system conceptual designs, training, and consulting. Example: The development and analysis of the total mission profile and life cycle of the improved satellite including examination of performance and cost tradeoffs. Contractors are awarded one or more of the following primary engineering disciplines (PEDs) under this Special Item Number: Chemical Engineering (CE); Civil Engineering (CI); Electrical Engineering (EE) Mechanical Engineering (ME)</p>
871 3	<p>System Design, Engineering and Integration - Services required under this SIN involve the translation of a system (or subsystem, program, project, activity) concept into a preliminary and detailed design (engineering plans and specifications), performing risk identification/analysis, mitigation, traceability, and then integrating the various components to produce a working prototype or model of the system. Typical associated tasks include, but are not limited to computer-aided design, design studies and analysis, high level detailed specification preparation, configuration, management and document control, fabrication, assembly and simulation, modeling, training, and consulting. Example: The navigation satellite concept produced in the preceding stage will be converted to a detailed engineering design package, performance will be computer simulated and a working model will be built for testing and design verification. Contractors are awarded one or more of the following primary engineering disciplines (PEDs) under this Special Item Number: Chemical Engineering (CE) Civil Engineering (CI) Electrical Engineering (EE) Mechanical Engineering (ME)</p>
871 4	<p>Test and Evaluation - Services required under this SIN involve the application of various techniques demonstrating that a prototype system (subsystem, program, project or activity) performs in accordance with the objectives outlined in the original design. Typical associated tasks include, but are not limited to testing of a prototype and first article(s) testing, environmental testing, independent verification and validation, reverse engineering, simulation and modeling (to test the feasibility of a concept), system, quality assurance, physical testing of the product system, training, and consulting. Example: The navigation satellite-working model will be subjected to a series of tests, which may simulate and ultimately duplicate its operational environment. Contractors are awarded one or more of the following primary engineering disciplines (PEDs) under this Special Item Number: Chemical Engineering (CE) Civil Engineering (CI) Electrical Engineering (EE) Mechanical Engineering (ME)</p>
871 5	<p>Integrated Logistics Support - Services required under this SIN involves the analysis, planning and detailed design of all engineering specific logistics support including material goods, personnel, and operational maintenance and repair of systems throughout their lifecycles, excluding those systems associated with real property. Typical associated tasks include, but are not limited to ergonomic/human performance analysis, feasibility analysis, logistics planning, requirements determination, policy standards/procedures development, long-term reliability and maintainability, training, and consulting. Example: The full range of life cycle logistics support for the navigation satellite will be identified and designed in this stage including training, operation and maintenance requirements, and replacement procedures. Contractors are awarded one or more of the following primary engineering disciplines (PEDs) under this Special Item Number: Chemical</p>
