<b>Company Name:</b>	Hancock Management LLC
<b>Brief Description:</b>	Hancock Management LLC is a Service Disabled Veteran Owned Small Business (SDVOSB) which has provided Advisory and Assistance Services to the Department of Defense since 1998. We have four GSA Schedules; 871- Professional Engineering Services (PES), 874- Mission Oriented Business Integrated Services (MOBIS), 874-V- Worldwide Logistics (LOGWORLD) and 70- Information Technology (IT). These schedules have allowed us to support the complete lifecycle of the commodities managed by the TACOM Material Enterprise. Hancock Management is unique among small businesses because we have supported all of the TACOM PSIDs including Soldier, Chem/Bio, Field Services and the supporting technical centers of Edgewood Chemical and Biological Center (ECBC) and Natick Soldier Research and Development Center (NSRDEC). We currently have employees deployed to Arghanistan. Our Quality Program is ISO compliant.

----------------------	-------------------------

## List of Interested Subcontractors/Teammates

TACOM Strategic Service Solutions (TS3)

As of 5/27/2014

<b>Brief Description:</b>	W.W.Williams Logistics was created and began selling parts to the Defense Logistic Agency (DLA) and military contractors such as AM General. We entered into a partnership with AM General to provide approximately 50 power packs per day to both Letterkenny and Red River Army Depots in support of their HMMWV recap lines. We maintain numerous warehouse facilities at both depots and pioneered the customer pay program. In addition we do line side fills, kitting, material management, warehousing and program consulting for BAE and A.M. General in their respective depot operations. In 2008, W.W.Williams Logistics was named the Letterkenney "Supplier of the Year". W. W. Williams also has over 425 technicians that can perform tactical wheeled vehicle maintenance and PM both CONUS and OCONUS.

----------------------	-----------------------------

## List of Interested Subcontractors/Teammates

TACOM Strategic Service Solutions (TS3)

As of 5/27/2014

<b>Brief Description:</b>	Small Business and Woman Owned - DCM Corrosion Services, LLC has been at the forefront of the military CPAC (Corrosion Prevention and Control) program since 1996. An innovator in surface preparation technology, an integral part of corrosion mitigation, DCM developed the DoD CPAC Corrosion Control Tool Kit specifically to enhance the safety and efficiency of corrosion prevention and control processes in the military. DCM's technology further allowed for the safe removal of CARC paints and other potentially dangerous surface coatings on a mobile basis, revolutionizing corrosion maintenance from a static base activity to an efficient mobile on-site process. This technology, along with the development of the innovative mobile service team concept and model (Corrosion Service Teams, "CST"), DCM has helped shape the current state of the art of Corrosion Control and Maintenance with respect to military ground combat and support equipment. DCM has expertise in corrosion maintenance servicing of over 300 different ground combat and support assets in many varied environments that include nearly every CONUS state as well as Hawaii. DCM has deployed corrosion technicians servicing U.S. Army assets at Fort Hood, Fort Polk, Fort Bragg, Fort Stewart, Schofield, HI, and Charleston, SC.

TACOM Strategic Service Solutions (TS3)

As of 5/27/2014

<b>Brief Description:</b>	Natel is primarily an Electronics Manufacturing Services (EMS) company with extensive capabilities in all aspects of the business. Natel manufactures LTCC, HTCC, AIN, BeO and thin film substrates for our customers and for internal use at our assembly facility in Chatsworth, CA. However, substrate manufacturing is only a small part of our prime interest, as our core competence and strategic growth areas are in the electronic assembly business of hybrids and microwave integrated circuits (MICs) and in particular, box build (next assembly) work. In support of this, we have two clean rooms, with about 40,000 sq. ft of space, fully equipped with die attach, ball and ribbon wire bonding, plasma clean, lid seal machines, together with all supporting assembly equipment and trained personnel.
